* These totals do not take into account the vast amount of intangible and indirect damage resulting from forest fires, such as that through decay of damaged timber, replacement of desirable species of trees by less desirable but more fire-resistant ones, soil deterioration and erosion, loss of wild life, uncertain stream flow, interrupted tourist traffic and the like.

(Tables compiled by the Division of State Cooperation, United States Forest Service, from data furnished by cooperating States, National Forest Supervisors, the National Park Service and the Office of Indian Affairs.)
